

Uday Verma

udayverma112006@gmail.com | +91 9354572705 | Delhi

CAREER OBJECTIVE

To apply my skills in Full-Stack Development, Machine Learning, Artificial Intelligence, and problem-solving to develop scalable and impactful solutions, contribute to innovative projects, and grow as a software developer.

WORK EXPERIENCE

Executive

Aug 2025 - Present

TEDx BVCOE, Delhi

Selected as an Elite Team Member for the TEDx Talk 2026 flagship event, managing senior speaker coordination, cross-functional teamwork, event operations, and on-ground execution to deliver a well-organized and successful event.

Executive Head

Aug 2025 - Present

IEEE BVCOE, Delhi

Led and coordinated multiple large-scale technical and student engagement events as an active member of IEEE BVCOE, contributing to the successful execution of flagship events including FUNIEEE, BVEST, and SPECTRUM.

EDUCATION

B.Tech, Computer Science & Engineering

2024 - 2028

Bharati Vidyapeeth's College of Engineering, Delhi

TRAININGS / CERTIFICATIONS

Object Oriented Programming (OOPs)

Nov 2025 - Jan 2026

YouTube, Virtual

Completed an in-depth Object-Oriented Programming using C++ course via YouTube, gaining strong understanding of OOP principles including classes & objects, encapsulation, inheritance, polymorphism, abstraction, constructors/destructors, and operator overloading, with practical implementation using C++.

Data Structures And Algorithm Using Python.

Jul 2025 - Present

udemy, Virtual

Learning DSA using Python as well as solving LeetCode problems simultaneously.

PROJECTS

[NexChain - Navigate the future of logistics ↗](#)

Apr 2026

Developed a full-stack logistics intelligence system featuring real-time shipment tracking, AI-driven decision automation, and predictive analytics. Implemented LSTM-based demand forecasting, NLP-powered disruption detection, multi-factor risk scoring, and route optimization. Built responsive React frontend with live map visualization and chat interface; Python/FastAPI backend with WebSocket real-time updates and automated action orchestration.

[GameVerse ↗](#)

Mar 2026

GameVerse – Full-Stack Gaming Platform

Built a multi-game web application with five interactive games and user authentication system. Backend features Express REST APIs with JWT authentication, bcryptjs password hashing, and MongoDB database integration. Frontend includes responsive game interfaces with HTML/CSS/JavaScript. Demonstrates full-stack development capabilities including secure authentication, database management, and interactive UI/UX design.

Tech Stack: Node.js, Express, MongoDB, Mongoose, JWT, bcryptjs, CORS

Samudra Setu ↗

Sep 2025

Designed an integrated disaster management platform for crowdsourced ocean hazard reporting and social media analytics under Smart India Hackathon 2025 (Problem ID: SIH25039). Implemented AI/NLP-based verification and image analysis to detect hazards, filter misinformation, and generate actionable insights.

Built an offline-first mobile and web solution with auto-sync and SMS fallback to support low-connectivity coastal regions.

Developed real-time hotspot maps, predictive alerts, and safe evacuation routes using OpenStreetMap and weather/satellite data.

Enabled role-based access for citizens, government officials, analysts, and volunteers to support coordinated disaster response.

Integrated gamification and reward mechanisms to improve community engagement and sustained participation.

Tech Stack: React.js, Tailwind CSS, Node.js, Python Flask, MongoDB/SQLite, NLP APIs, Cloud Deployment

SKILLS

- | | | |
|-------------------------------------|-------------------------------------|-------------------|
| • HTML | • Python | • Data Structures |
| • Adobe Photoshop | • C Programming | • C++ Programming |
| • Canva | • Object Oriented Programming (OOP) | • SQL |
| • Database Management System (DBMS) | • JavaScript | • CSS |
| • Web development | • MySQL | • LLMOps |
| • Artificial intelligence | • Generative AI Tools | • Linux |
| • GitHub | | |

EXTRA CURRICULAR ACTIVITIES

- Athletics
- Gaming
- Gym
- Music

ADDITIONAL DETAILS

- Made it to 2nd Round in BVP-Hex.
- Won 3rd place in CodeClash Event organised in my College.
- Pre-Event planning and on-ground execution from my college society
- Secured 2nd position in Pixel to Prompt event organized by BVIMR Delhi.

VaxConnect

Nov 2024

Designed and developed a user-centric web application to help individuals manage their vaccination schedules efficiently. The platform enables users to track completed and upcoming vaccine doses, receive timely reminders, and locate nearby vaccination centers using integrated geolocation services. The goal was to enhance public health accessibility and streamline vaccination processes through smart, intuitive technology.
